Computer Science & Coding		<ul style="list-style-type: none"> • Copy an example code. • Read and understand code. • Remix code to achieve a particular outcome. • Debugging. • Use printed code snippets so that children can't run the code but must read it. • Include unplugged activities and 'explaining' tasks e.g. 'how do variables work?' 	<ul style="list-style-type: none"> • To understand what is meant by - home, bottom, and top rows. • Developed ability to touch type the home, bottom, and top rows. • I can use two hands to type the letters on the keyboard. • I can touch type using my left hand. • I can touch type using my right hand. • Children can create a design that represents a sequential algorithm. • Children can use a flowchart design to 	<ul style="list-style-type: none"> • Children can structure search queries to locate specific information. • Children have used search to answer a series of questions. • Children have written search questions for a friend to solve. • Children can analyse the contents of a web page for clues about the credibility of the information. 	<ul style="list-style-type: none"> • To design and write a program that simulates a physical system. • Children can explain how their program simulates a physical system. • Children can reflect upon the effectiveness of their simulation. • To review the use of number variables in 2Code. • To explore text variables. • Children can explain what a variable is in programming. 	<ul style="list-style-type: none"> • Children can plan a program before coding to anticipate the variables that will be required to achieve the desired effect. • Children can follow through plans to create the program. • Children can debug when things do not run as expected. • To debug a program and organise the code into tabs.

Follow the example of Jesus

create the code.

- Children can explain what Object, Action, Output, Control and Event are in computer programming.
- Children can explain what a variable is in programming.
- Children can explain why variables need to be named.
- Children can create a variable in a program.
- Children can set/change the variable values appropriately to create a timer

- Children can set/change the variable values appropriately.
- Children know some ways that text variables can be used in coding.
- Children can create a game which has a timer and score pad.
- Children can use variables to control the objects in the game.
- Children can create loops using the timer and If/else statements.

Information Technology	<ul style="list-style-type: none"> To sort items using a range of criteria. To sort items on the computer using the 'Grouping' activities in Purple Mash. Children understand what is meant by 'technology'. Children have considered types of technology used in school and out of school. 	<ul style="list-style-type: none"> Children understand what Sequence is and how it works. Children use the different sounds within Sequence to create a tune. Children explore how to speed up and slow down tunes. Children understand what happens to the tune when sounds are moved. Children can change the volume 		<ul style="list-style-type: none"> Children look at and discussed a variety of written material where the font size and type are tailored to the purpose of the text. Children use text formatting to make a piece of writing fit for its audience and purpose. Children use Connect to mind-map ideas for a community campaign. 	<ul style="list-style-type: none"> Children can review and analyse a computer game. Children can describe some of the elements that make a successful game. Children can begin the process of designing their own game. Children can design the setting for their game so that it fits with the selected theme. Children can upload images or use the drawing 	<ul style="list-style-type: none"> Children understand how a blog can be used as an informative text. Children understand the key features of a blog. To understand how to write a blog. To consider the effect upon the audience of changing the visual properties of the blog. To understand the importance of regularly updating the content of a blog.

Follow the example of Jesus

		<p>of the background sounds.</p> <ul style="list-style-type: none">• Children create their own tune using some of the chosen sounds.• Children understand what is meant by 'technology'.• Children consider types of technology used in school and out of school.• Children record 4 examples of where technology is used away from school.			<p>tools to create the walls, floor and roof.</p> <ul style="list-style-type: none">• Children can design characters for their game.• Children can decide upon, and change, the animations and sounds that the characters make.
